

Polyethylene Wax 220

PE Wax 220 is based on polyethylene and is used as a lubricant in the rubber and plastic industries, among others. It is insoluble in organic solvents at room temperature but dissolves in non-polar solvents.

Properties	Unit	Value
Color		White
Form		Flake
Melting Point	°C	105
Volatility	%	<1
Density	g/cm ³	0,89
Viscosity		150

Application:

It is used as a lubricant in the rubber and plastic industries, for example, in masterbatch, compound, wall covering, waterproofing membrane (isogam), wood-plastic, film, cable industries, and more.

Recommended Usage:

Depending on process conditions, equipment, and formulation, the suggested dosage ranges from 0.1 to 1 phr.

Packaging:

Available in **25 kg polypropylene bags**.
